Apparently Old Age Slowing **Up Truman**

By JAMES MARLOW Associated Press News Analyst

WASHINGTON (A) - Former resident Truman, one of the most fiery campaigners in the history of American politics, is slowing up

Not by choice, though. Apparently his age - he's 71and his health are finally saying to him: "Who."

Only 13 days ago Truman said he felt in "tip-top" shape and fully recovered from his major operation last year. He was anxious to get started on a series of give-'emhell speeches against the Republicans this month and next—a kind of warmup for next year's presidential campaign when he hoped to help the Democrats throw the Republicans out.

And he did get started. He made a speech in Indiana Saturday and another in Michigan last night. But he had to cancel two speeches scheduled for California in September.

He said he called off the West Coast trip on the advice of his physician and the "prodding" of his wife. But he seemed in the best of spirits when he told news-

something "They are afraid might happen to the old man.", He indicated the long journey to the Coast might be too taxing, although the speeches in California wouldn't be made until mid-September.

Just recently Michigan's governor, G. Mennen Williams, whom Truman praised highly last night, infuriated the Republicans by suggesting President Eisenhower, now 64, would be too old next year to seek re-election.
